

Proven Success! We have enjoyed a lasting relationship with such recognized leaders in the Biotech industry as Lonza Biologics, Genzyme, Boston Scientific and Abbott Labs; Entrusting us with their equipment, their priceless research data, the relocation of their valued employees we invite you to share in the peace of mind they have experienced moving with us. Tobin & Sons Moving and Storage has been providing services to the commercial, biotech, corporate, medical, residential and industrial markets of New England since 1960. Our crews and equipment are highly specialized and able to accomplish moves of any dimension. Our goal of "Total Quality Management" shows in every phase of our business from the initial telephone contact, through our moving consultants visit, the preparation and follow through of the estimate, the precision of the move and the post-move follow up. Every detail of your relocation is pre-planned by our professionals-We leave nothing to chance!

The requirements and demands of the Biotech industry are unique and unyielding to less than perfection. Tobin and Sons has the knowledge and skill level required to service this unique segment of the Moving Industry. Our years of experience have taught us the parameters and guidelines to ensure flawless projects. Clean Room environments pose no problem or obstacle to our experienced relocation crew. Projects that represent years of research can be entrusted to us to move locally or across the globe: from the specialized packing materials, to assessing the needs for dry ice, gel packs or custom critical service, Tobin and Sons will coordinate everything, including required paperwork and validated service.

Remember, whether you're moving a laboratory, a ten room home, an office full of people, or a factory full of machinery, Tobin & Sons will be there by your side every step of the way. We can, and will take the worry out of your relocation!

Tobin and Sons is offering special discounts on all of our services to members of the NH Biotech Council.
